DREAMERS

FW 27-28

I **sogni** sono una forza positiva: ci permettono di vedere mondi che non avremmo osato immaginare e di credere in possibilità che prima sembravano lontane. Ampliano l'**immaginazione** e ci rendono più coraggiosi nel percorrere strade nuove, inattese. Sognare è un ritorno all'infanzia, a un luogo in cui tutto è possibile e ancora da scoprire, ma è anche un atto di fiducia verso il futuro e ciò che può ancora prendere forma. Oggi più che mai sentiamo il bisogno di sognare, come **desiderio silenzioso** di ciò che deve ancora arrivare.

La collezione nasce da un universo legato al momento del sonno, dove gli elementi della camera da letto diventano punto di partenza per il tema del sogno: quilt astrologici, superfici imbottite, coperte in velluto ricamate e pellicce che richiamano il rituale del contare le pecore prima del sonno. Un linguaggio che si intreccia con l'**esoterismo** dei tarocchi e con l'astrologia, intesi come strumenti di lettura dei sogni e dei desideri futuri, un modo per interpretare i segni del cielo e aprire lo spazio dell'immaginazione verso ciò che deve ancora arrivare. La **palette cromatica** attraversa il **profondo della notte**, illuminata da **riflessi argentei e dorati**, con **toni violacei galattici** e accenti di **verde scuro**.

*Dreams are a positive force: they allow us to see worlds we would not have dared to imagine and to believe in possibilities that once felt out of reach. They expand the **imagination** and make us braver in taking new, unexpected paths. To dream is to return to childhood, to a place where everything is still possible and waiting to be discovered, but it is also an act of trust in the future and in what is yet to take shape. More than ever, we feel the need to dream, as a **silent desire** for what has yet to come.*

*The collection emerges from a universe rooted in the moment of sleep, where bedroom elements become the starting point for the idea of dreaming: quilted astrological patterns, padded surfaces, embroidered velvet blankets, and faux furs evoking the ritual of counting sheeps to fall asleep. A language intertwined with the **esotericism** of tarot and astrology, understood as tools to read dreams and future desires, a way to interpret the signs of the sky and open up space for imagination toward what is yet to come. The **colour palette** moves through the **depth of the night**, illuminated by **silver and golden reflections**, with **galactic purples** and touches of **dark green**.*
